EDUCATION

PES University

Bachelor of Technology in Computer Science and Engineering

- Academic Excellence: Class XII – 96.83%, Class X – 99.36%

Bangalore, India

Aug 2023 – May 2027

EXPERIENCE

Freelance Software Developer

June 2026 – Present

Karnataka State Lawn Tennis Association

- Developed and delivered the MVP, securing project approval and selection directly from the club's Vice President
- Collaborated with an external UI/UX team while owning end-to-end development of a jargon-free platform architected to scale to 2,000+ active users
- Own the ongoing development lifecycle, defining future technical requirements based on progress analysis and user feedback

Open Source Contributor

Apr 2026 – Jul 2026

Once UI | Longhorn Developers

- Debugged and fixed a touch-interaction defect in Once UI's Button/ToggleButton components, eliminating false hover states on mobile while preserving keyboard accessibility [link]
- Designed and shipped a numeric-sizes shorthand API for Once UI's Media component, removing repetitive boilerplate for a common responsive-image use case [link]
- Resolved UI/dashboard styling inconsistencies in Degree-Audit-Plus against Figma specs, improving visual accuracy across GPA and credit-tracking cards [link]

Software Developer Intern

Dec 2025 – May 2026

Shorinkai India

entrydesk.shorinkai.in

- Analyzed, debugged, and resolved live production issues during tournament operations, maintaining 100% system uptime across deployments
- Co-developed EntryDesk, a full-stack TypeScript event management platform with organizer and coach portals, contributing to its design, development, deployment, and maintenance for live karate tournaments
- Co-developed RingFlow (Next.js, TypeScript, Supabase), a live tournament management system that balanced ring workloads, tracked match progress, and delivered real-time updates to athletes, coaches, and spectators via Supabase Realtime
- Co-developed HonorLog, a public student-achievement directory featuring fuzzy search (Fuse.js), tournament and medal history, role-based administration, audit logging, and JSON/XLSX bulk import
- Led an 8-member tournament operations team across two CISCE karate championships, coordinating live tournament scheduling, category assignments, score updates, and prize administration for 400+ participants at each event

PROJECTS

GitVital | Next.js, TypeScript, Node.js, Redis, BullMQ, GitHub GraphQL API

gitvital.com | GitHub

- Designed a self-throttling GitHub GraphQL client that parses rate-limit response headers to compute exact backoff windows, keeping ingestion under GitHub's 5,000-point/hour quota with zero manual throttling
- Architected an asynchronous BullMQ/Redis worker pipeline to offload multi-thousand-commit ingestion off the request thread, with the frontend polling job status for a non-blocking UX
- Built a pure-function health-scoring engine that dynamically redistributes weights across commit velocity, PR turnaround, and issue backlog when a metric is missing, and integrated the Gemini API for AI-generated repo insights

TECHNICAL SKILLS

Languages: JavaScript/TypeScript, C/C++, SQL, HTML/CSS

Frameworks & Libraries: Next.js, React, Node.js

Databases & Backend: Redis, RESTful APIs, WebSockets

Tools & Technologies: Git/GitHub, Vercel, GitHub API

Computer Science Fundamentals: Data Structures, Algorithms, OOP, Design Patterns, DBMS, Operating Systems
