Education

PES University

B.Tech, Computer Science and Engineering

Bangalore, India

Aug 2023 – May 2027

Experience

Freelance Software Developer

Karnataka State Lawn Tennis Association

June 2026 – Present

Bangalore

- Developed and delivered the MVP, securing project approval from a panel of KSLTA leadership
- Built a production-ready React Native/Expo frontend for a member platform designed to scale to 2,000+ active users

Technical Operations Lead · Freelance Software Developer

Shorinkai India

Dec 2025 – July 2026

entrydesk.shorinkai.in

- Promoted to lead on-site technical operations for live championships, managing the tournament management software suite
- Led an 8-member operations team across two CISCE karate championships, running live scheduling, scoring, and prize administration for 400+ participants per event
- Co-developed EntryDesk and HonorLog, full-stack TypeScript platforms for tournament operations and a 200+ student achievement directory

Open Source Contributor

Once UI | Longhorn Developers

Apr 2026 – Jul 2026

- Fixed a touch-interaction defect in Once UI's Button/ToggleButton by scoping hover styles behind pointer media queries, removing false hover states while preserving keyboard accessibility [#71]
- Shipped a numeric-sizes shorthand API for Once UI's Media component, auto-generating responsive sizes strings and eliminating boilerplate [#72]
- Aligned GPA and credit-total card styling in Degree-Audit-Plus, a WXT/React/TypeScript Chrome extension, to Figma specs under a GPG-signed commit workflow [#194]

Projects

GitVital | Next.js, TypeScript, Node.js, Express, Redis, GitHub GraphQL API

gitvital.com | GitHub

- Built a self-throttling GitHub GraphQL client that computes exact backoff windows from rate-limit headers, keeping multi-thousand-commit ingestion under GitHub's 5,000-point/hour quota
- Built an asynchronous ingestion pipeline with job-status polling for a non-blocking UI, using Redis as metrics cache, session store, and AES-256-GCM-encrypted OAuth token store behind a 4-layer rate limiter
- Implemented a composite repository health score with dynamic weight redistribution and bus-factor risk analysis, plus Gemini-backed insights with a rule-based fallback

RingFlow | Next.js, TypeScript, Supabase (Postgres, Realtime, RLS)

ringflow.cruxstudios.dev

- Co-developed an event-sourced floor-management system for live multi-ring tournaments, deriving all UI state from an immutable append-only event log
- Enforced multi-tenant role-based access (Admin/Organiser/Stager/Moderator/Public) via ephemeral, revocable access codes backed by Postgres Row-Level Security, with automatic reconnection and state resync after network drops
- Deployed across 3 live tournaments in Bangalore, cutting floor-management time by ~3 hours per tatami (~9 hours per event), and supporting 400+ athletes and 30+ coaches per tournament; now being extended state-wide with AKSKA

Technical Skills

Languages: TypeScript/JavaScript, Python, C/C++, SQL, HTML/CSS

Frameworks: Next.js, React, React Native (Expo), Node.js, Express

Data & Backend: PostgreSQL, Supabase (Realtime, RLS), Redis, REST, GraphQL, WebSockets, OAuth 2.0

Tools: Git/GitHub, Vercel, Gemini API

Fundamentals: Data Structures, Algorithms, OOP, Design Patterns, DBMS, Operating Systems
