Education

PES University

B.Tech, Computer Science and Engineering

Bangalore, India

Aug 2023 – May 2027

Experience

Freelance Software Developer

June 2026 – Present

Karnataka State Lawn Tennis Association

Bangalore

- Designed and delivered a full-fidelity **React Native/Expo** member platform prototype, securing project approval from KSLTA leadership panel
- Built **10 screens** across court/room/hall booking, billing, and profiles with custom navigation and component library

Technical Operations Lead · Freelance Software Developer

Dec 2025 – July 2026

Shorinkai India

- Promoted to lead** on-site technical operations for live championships, managing the tournament management software suite
- Led an **8-member operations team** across two CISCE championships, managing scheduling, scoring, and administration for **400+ participants per event**
- Co-developed **EntryDesk and HonorLog**, full-stack TypeScript platforms for tournament operations and a 200+ student achievement directory

Open Source Contributor

Apr 2026 – Jul 2026

Once UI | Longhorn Developers

- Fixed a touch-interaction defect in Once UI's Button/ToggleButton by scoping hover styles behind **pointer media queries**, preserving keyboard accessibility [#71]
- Shipped a **numeric-sizes shorthand API** for Once UI's Media component, auto-generating responsive **sizes** strings and eliminating boilerplate [#72]
- Aligned card styling in Degree-Audit-Plus, a **WXT/React/TypeScript Chrome extension**, to Figma specs under a GPG-signed workflow [#194]

Projects

GitVital | Next.js, TypeScript, Node.js, Express, Redis, GitHub GraphQL API

gitvital.com | [GitHub](https://github.com)

- Built a **self-throttling GitHub GraphQL client** that computes exact backoff windows from rate-limit headers, keeping multi-thousand-commit ingestion under GitHub's **5,000-point/hour quota**
- Built an **asynchronous ingestion pipeline** with job-status polling for a non-blocking UI, using Redis as metrics cache, session store, and encrypted OAuth token store behind a **4-layer rate limiter**
- Implemented a **composite repository health score** with dynamic weight redistribution and **bus-factor risk analysis**, plus Gemini-backed insights with a rule-based fallback

RingFlow | React, Next.js, TypeScript, PostgreSQL, Drizzle ORM, WebSockets

ringflow.cruxstudios.dev

- Co-developed an air-gapped on-premise tournament platform deployed across **4 tournaments**, managing 4 concurrent rings, **400+ athletes per event**, and 30+ live floor devices with zero cloud dependency.
- Built a centralized **WebSocket** event bus backed by **PostgreSQL LISTEN/NOTIFY**, propagating every score, bracket advancement, and queue update across referee consoles, arena TV scoreboards, stager desks, and judge phones from a single pub/sub broadcast.
- Implemented a **seeded deterministic bracket engine** with club-separation, repechage, and concurrency locks, paired with an **append-only audit log**, cutting bracket disputes and delays by ~3 hrs/ring

Technical Skills

Languages: TypeScript/JavaScript, C/C++, SQL, HTML/CSS

Frameworks & Libraries: Next.js, React, React Native (Expo), Express

Backend & Data: Node.js, PostgreSQL, Supabase, Redis, REST, GraphQL, WebSockets, OAuth 2.0

Tools & Platforms: Git/GitHub, Vercel, Netlify, Render, Cloudflare

Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems
